# Why Microsoft 365?

## Save your company money

Microsoft 365 is available as a simply, monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

## Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

## Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

## Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

## Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
